Junior financial assistant transitioning to data analysis

ABOUT ME

I hold a Bachelor's degree in Management (Banking, Finance & Insurance) and a Master's degree in Financial Institutions Management from Université Cheikh Anta Diop de Dakar. My academic background combines strong theoretical foundations with hands-on experience in finance and accounting.

I am proficient in the Microsoft Office suite and accounting software such as Sage, and I am building technical fluency in Python for data analysis and automation, laying the foundation for my transition toward a career in data analytics.

I bring together financial rigor and genuine curiosity for what numbers reveal. Calm, organized and detail-oriented, I thrive in environments that value precision, confidentiality and teamwork, and I am committed to growing into a multidisciplinary profile at the intersection of finance and data.
